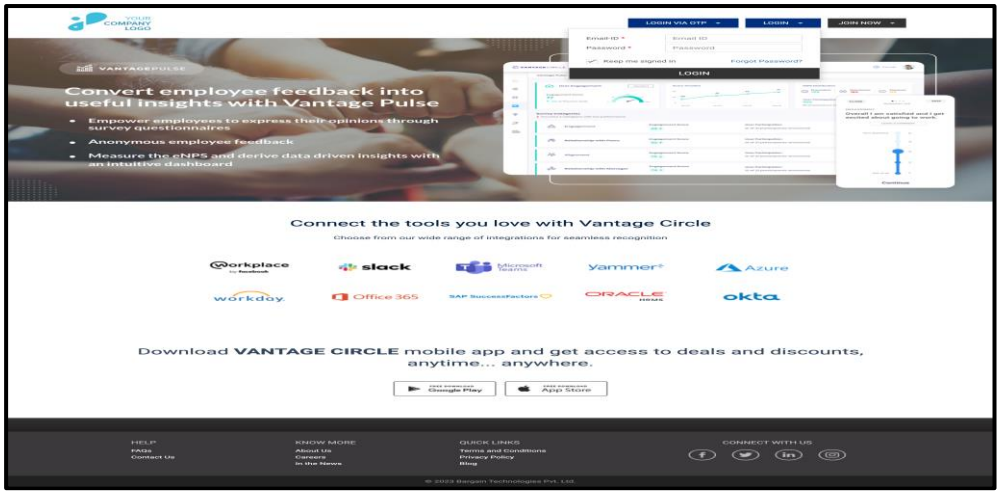
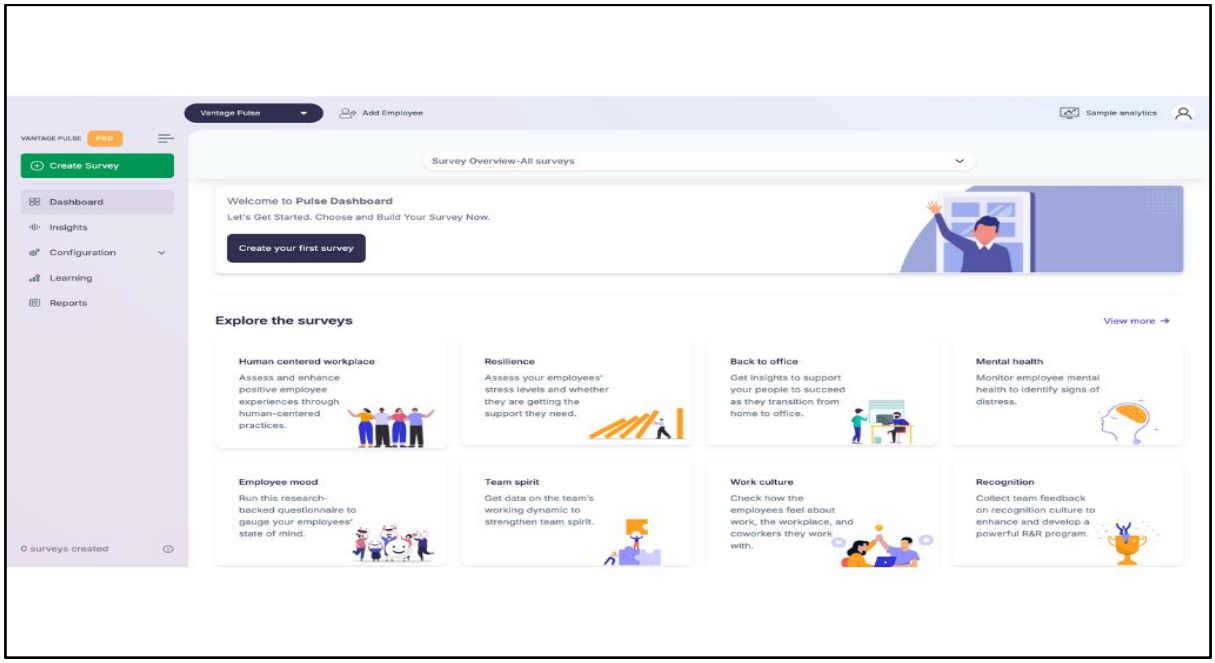
Vantage Pulse - Step-by-Step Guide (Dashboard & Creation) for HRs & Admins

1. Logging In to Your Vantage Pulse Account

- **Step 1:** Open your browser and navigate to the **Vantage Pulse** login page.
- **Step 2:** Enter your login credentials (email and password).
- **Step 3:** Click on **Log In**



2. Navigating to the Dashboard



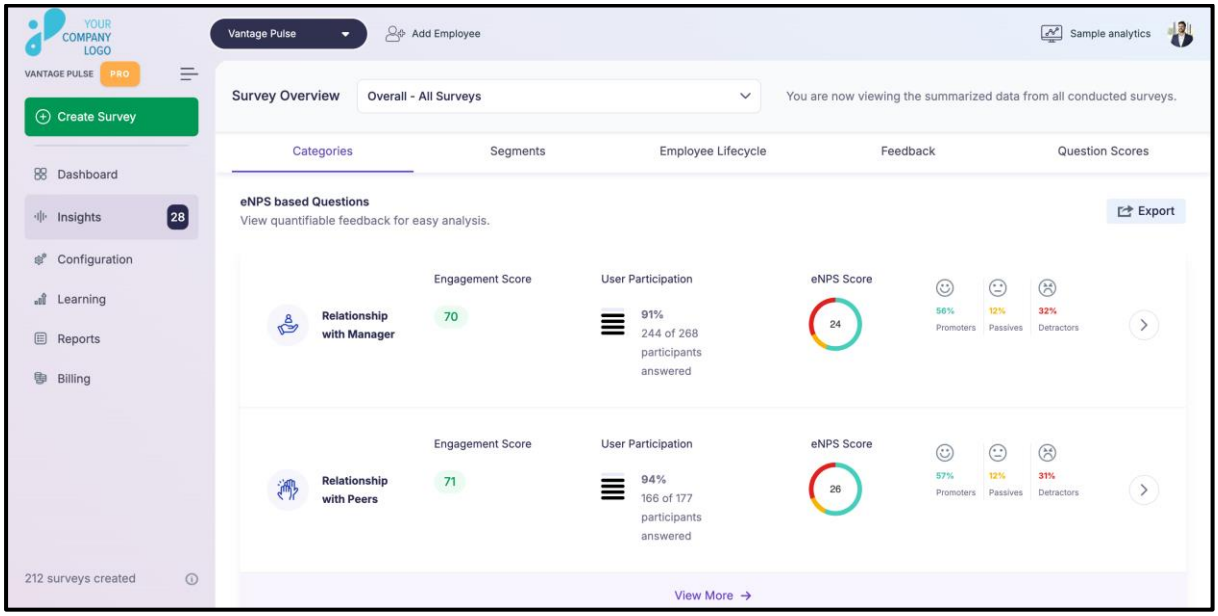
Once you log in, you'll be directed to the **Dashboard**. This serves as the **hub** of all engagement metrics for your organization's surveys. From here, you can access an aggregate view of all surveys or focus on specific surveys for detailed insights.

On the **Dashboard**, you'll see the following key metrics:

- **Engagement Score:** A numerical value indicating overall employee engagement across surveys.
- **eNPS Score:** The Employee Net Promoter Score showing employee loyalty, broken down into **Promoters**, **Passives**, and **Detractors**.
- **User Participation:** Displays the percentage and number of employees who participated in the surveys.
- **Suggested Improvement:** This section highlights the areas with scope of improvement and suggests course of action.
- **Engagement Score Timeline:** This is a line graph that shows how the engagement score has changed over time.

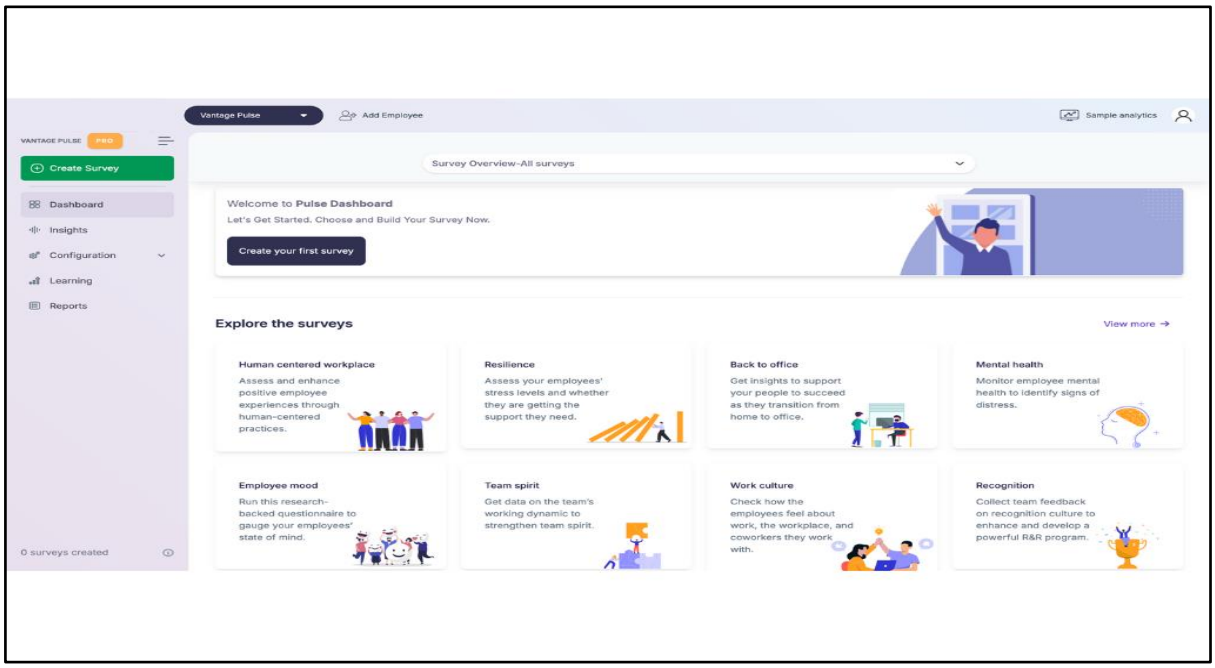
These metrics help you quickly assess the overall health of your organization's engagement levels.

3. Top & Bottom Categories



The **Top 3 Categories** show areas where your organization is performing well, while the **Bottom 3 Categories** highlight areas that may need attention. These categories are based on the engagement and feedback scores from your surveys, helping you focus on areas of improvement.

4. Survey Creation Process on Vantage Pulse

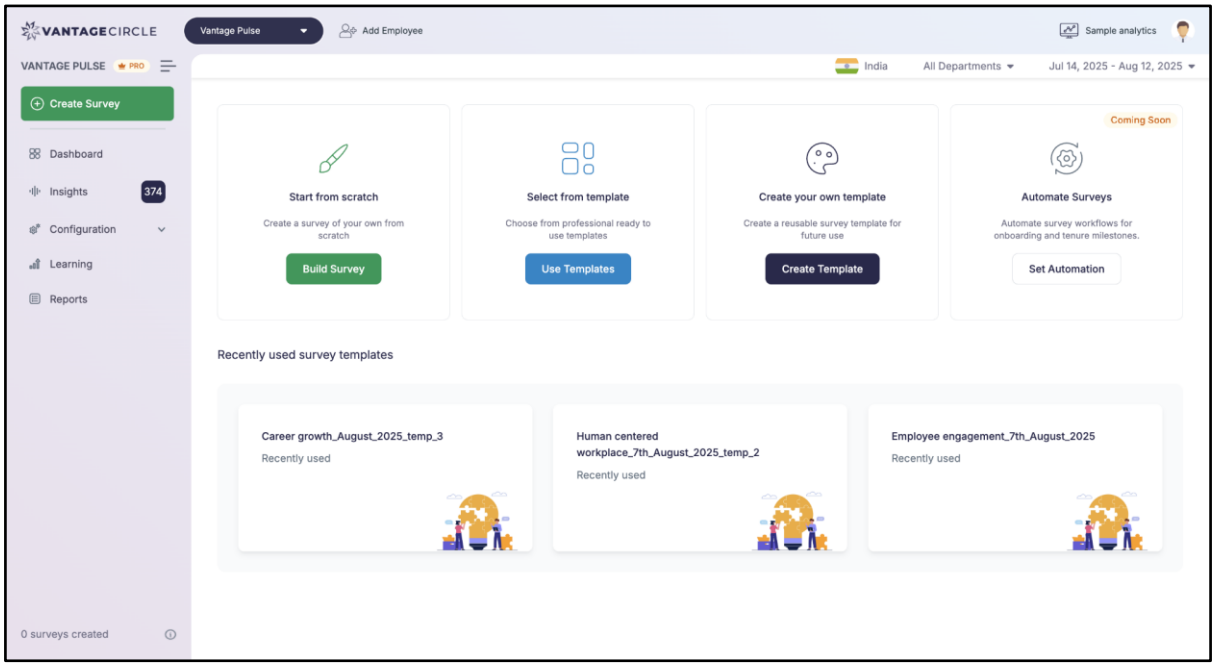


To create a new survey, you have two convenient options:

Option 1: Click on the **"Create Survey"** button in the left-hand menu sidebar.

Option 2: Click on the **"Create your first survey"** button located in the main dashboard banner area.

Both options will take you to the survey creation interface where you can either create your survey from scratch, use a prebuilt template, or create your own template.



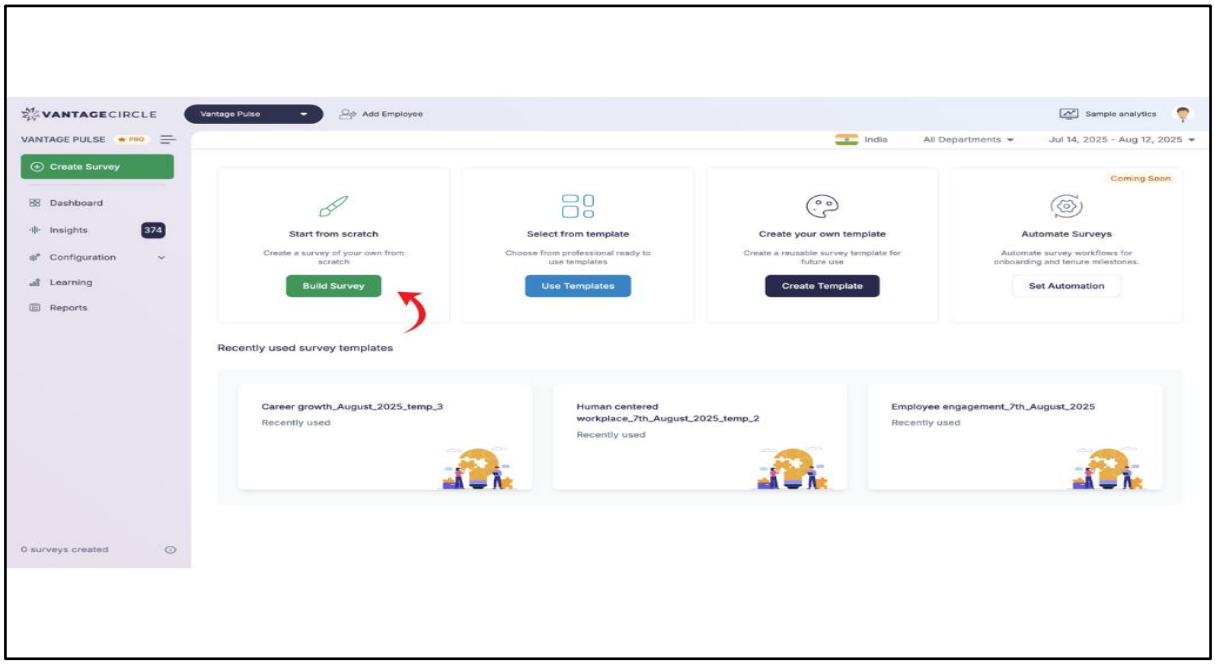
Survey Creation Options:

1. **Start from scratch**: Create a survey of your own from scratch by clicking "**Build Survey**"

2. **Select from pre-built templates**: Choose from professional ready-to-use templates by clicking "**Use Templates**"

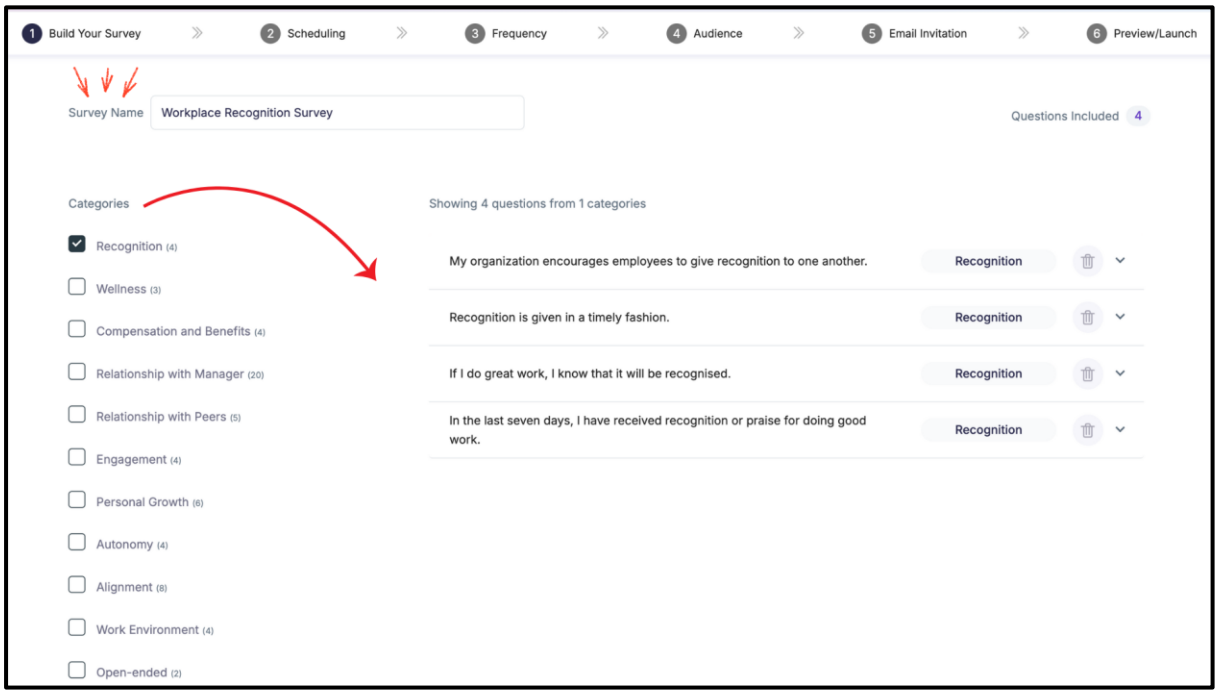
3. **Create your own template**: Create a reusable survey template for future use by clicking "**Create Template**"

4. **Automate Surveys**: Set up automated survey workflows for onboarding and tenure milestones by clicking "**Set Automation**"



If you decide to create your own custom survey from scratch instead of using the prebuilt surveys, simply click on **build survey** button.

5. Name Your Survey and Select Categories:



After you've named your survey and selected the category, you'll see the list of questions associated with it.

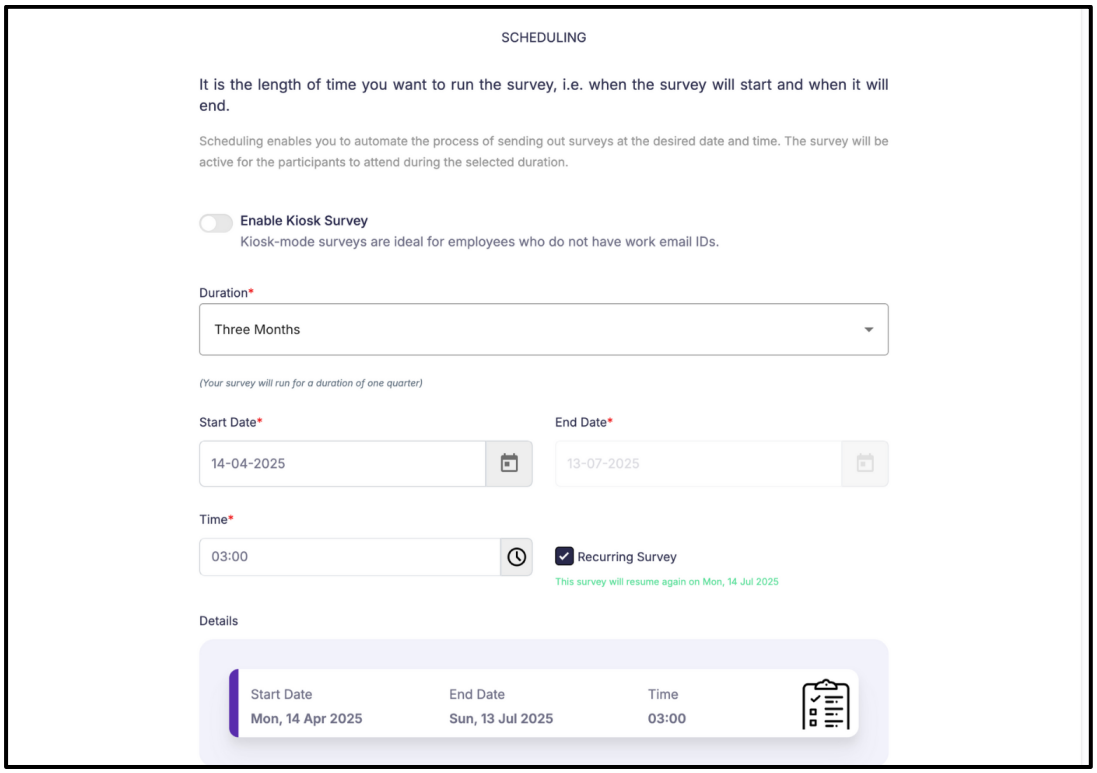
Each question can be one of three types:

- **eNPS (5-point scale)**
- **Multiple Choice Questions (MCQ)**
- **Open-ended**
  You can delete any questions you feel aren't relevant. Additionally, you can decide whether answering a specific question should be mandatory, and if you'd like, you can also make adding comments mandatory, ensuring you get detailed, meaningful responses.

6. Schedule Your Survey

In the scheduling step, you'll set when your survey starts and ends.

Here’s how it works:



- **Select Duration:** Choose how long the survey will run, options include One Month, Three Months, One Year, or a One-Time survey.
- **Set Dates:** Choose the Start and End dates for your survey.
- **Pick a Time:** Decide the exact time your survey will go live.

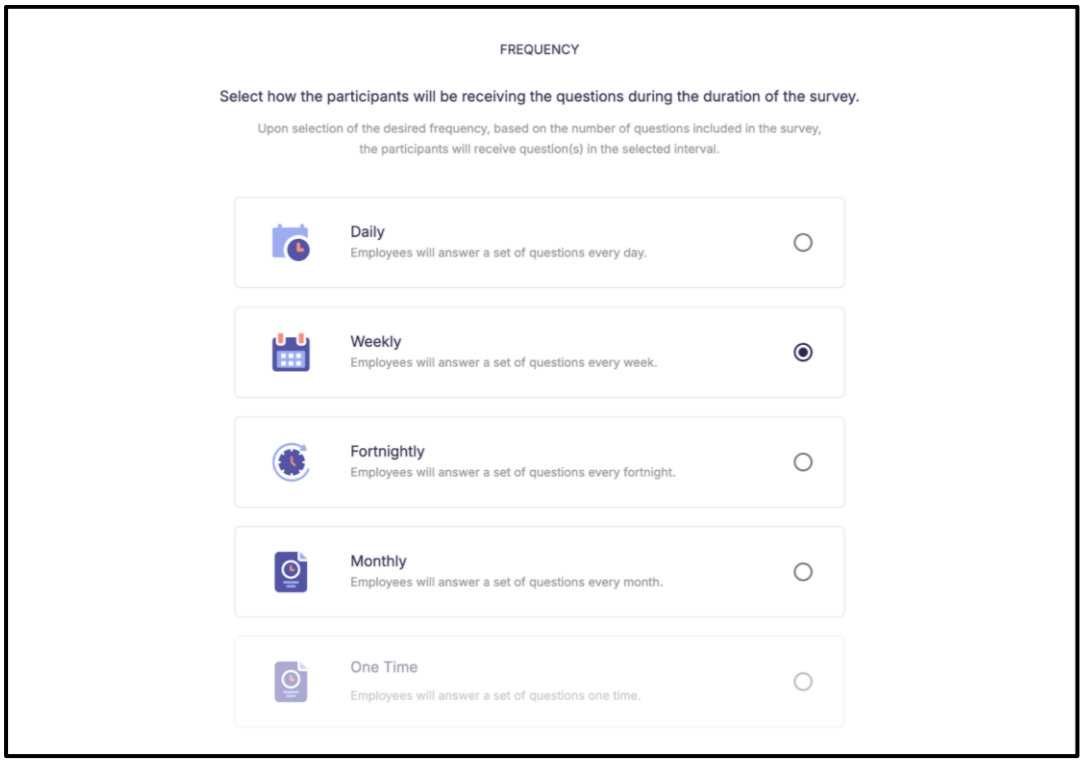
Additionally, you can enable **Kiosk Survey** mode, perfect for employees who might not have access to work email IDs. This makes sure everyone's voice is heard.

All your scheduling details will be clearly displayed below for quick confirmation.

7. Select Survey Frequency

In the **Frequency** step, decide how often your employees will receive and respond to survey questions.

You can choose from:



- **Daily:** Employees get questions every day.
- **Weekly:** Questions sent once every week.
- **Fortnightly:** Surveys sent once every two weeks.
- **Monthly:** Employees answer questions once a month.
- **One-Time:** Employees will receive the survey questions just once during the entire duration.

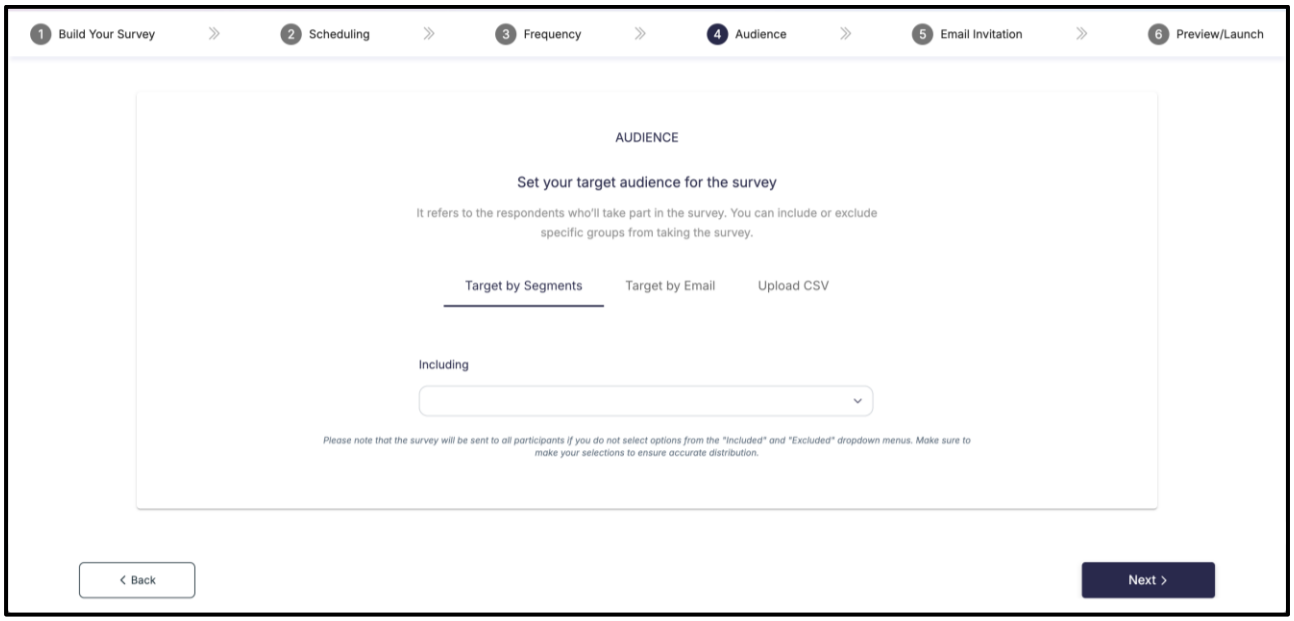
Pick the frequency that fits your goals best and click **Next** to continue.

Pro Tip: Keep surveys short, 10–12 questions max. Too many questions can overwhelm participants, leading to drop-offs or skewed responses.

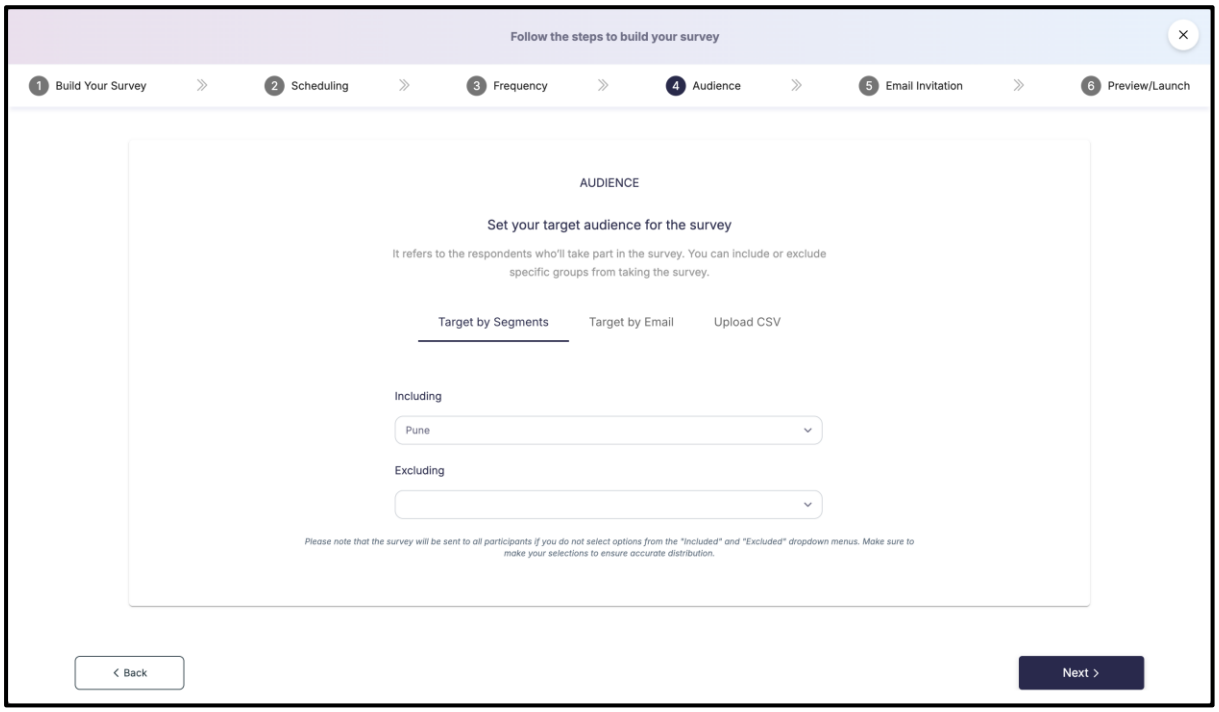
8. Selecting Your Survey Audience

After setting how frequently your survey will run, choose **who** you want to target with your survey.

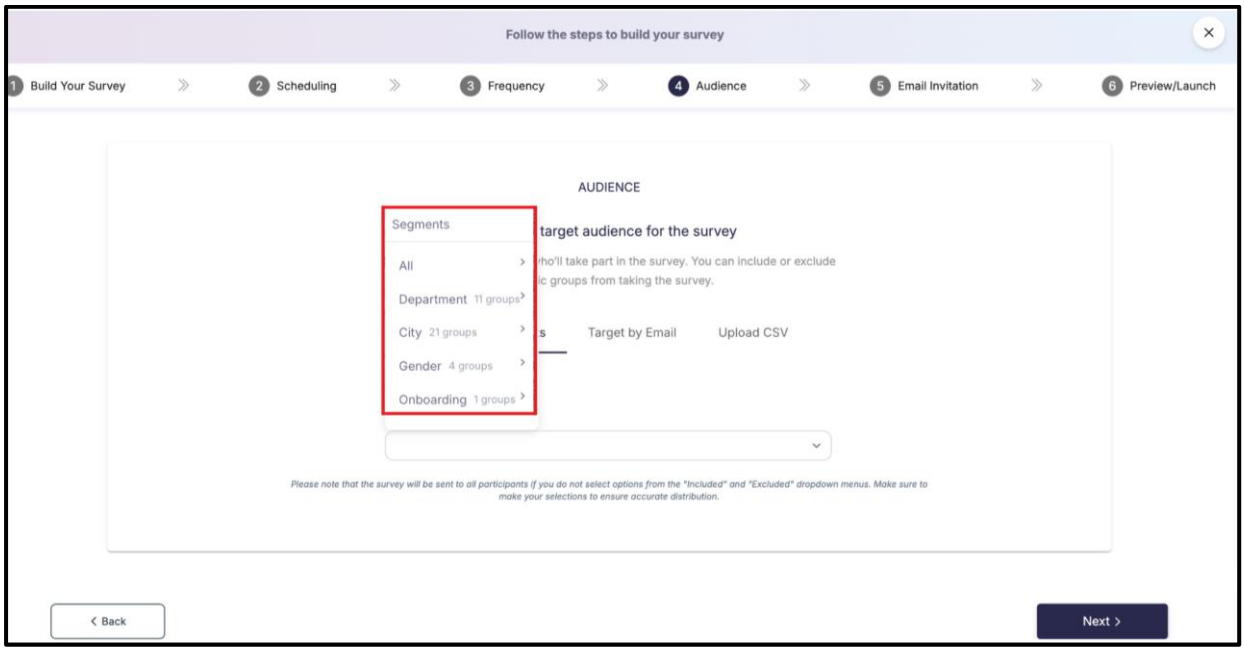
- **Target by Segments:** Select your audience based on broad segments:
  - **Department** (e.g., HR, Marketing, Sales, etc.)
  - **City** (specific office locations)
  - **Gender** (male, female, or other gender identities)
  - **Onboarding status** (new employees)



You can also fine-tune your audience further by excluding specific segments. For example, after choosing a city like Pune, you can exclude certain departments or groups to ensure your survey targets exactly who you want.

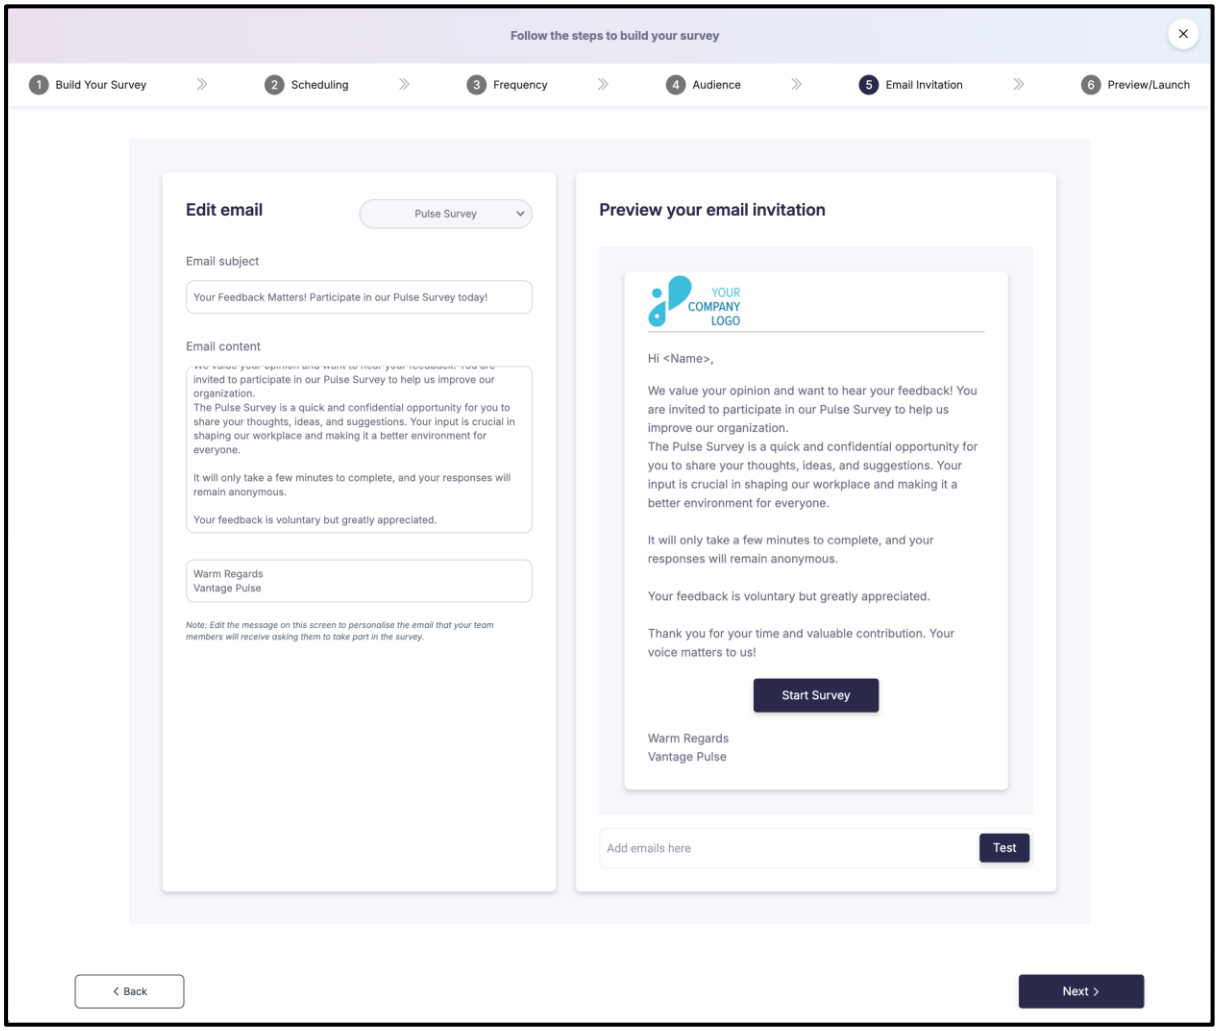


Note: Each segment also has additional sub-filters, allowing even more precise targeting. For example, within departments, you can choose specific teams or divisions.



- **Target by Email:** Directly select individual employees by their email addresses.
- **Upload CSV:** You can also select your audience easily by uploading a CSV file containing employee details. This allows you to quickly target specific employees for your survey.

9. Email Invitation



This is where you draft the message that will be sent to employees, inviting them to take the survey. You can edit the subject and body of the email, and preview exactly how it will appear to your recipients.

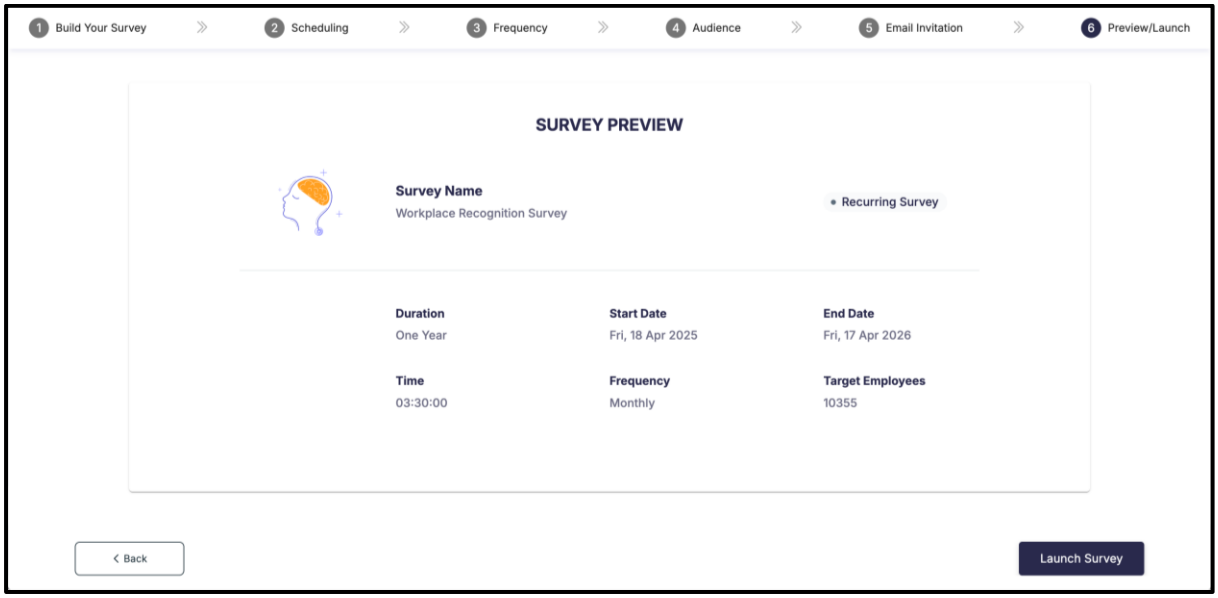
There are four preset email formats you can choose from, depending on your survey type:

- Pulse Survey
- Mental Health Survey
- Work Culture
- Back to Office

Pick the one that matches your survey, personalize it, and you're ready to move on

10. Preview & Launch screen.

This is the final step before your survey goes live,



Here, you'll see a quick summary of everything you've set up so far:

- Survey name
- Duration
- Start and end date
- Time
- Frequency
- Target audience

Take a moment to review all the details. If everything looks good, just hit **Launch Survey**, and you're all set!
