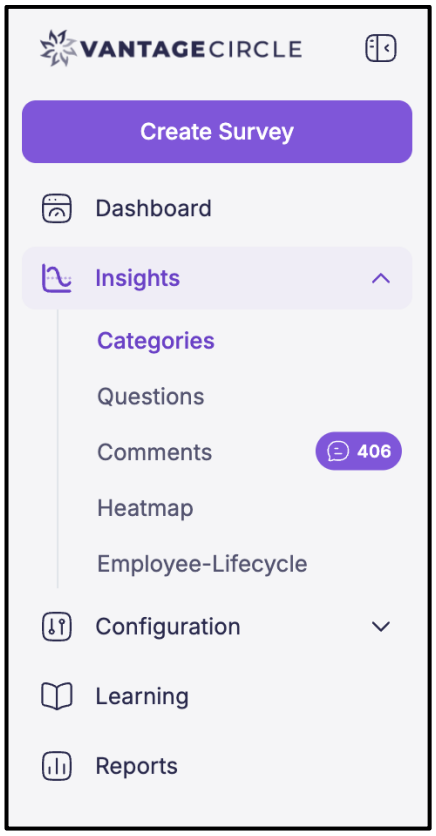
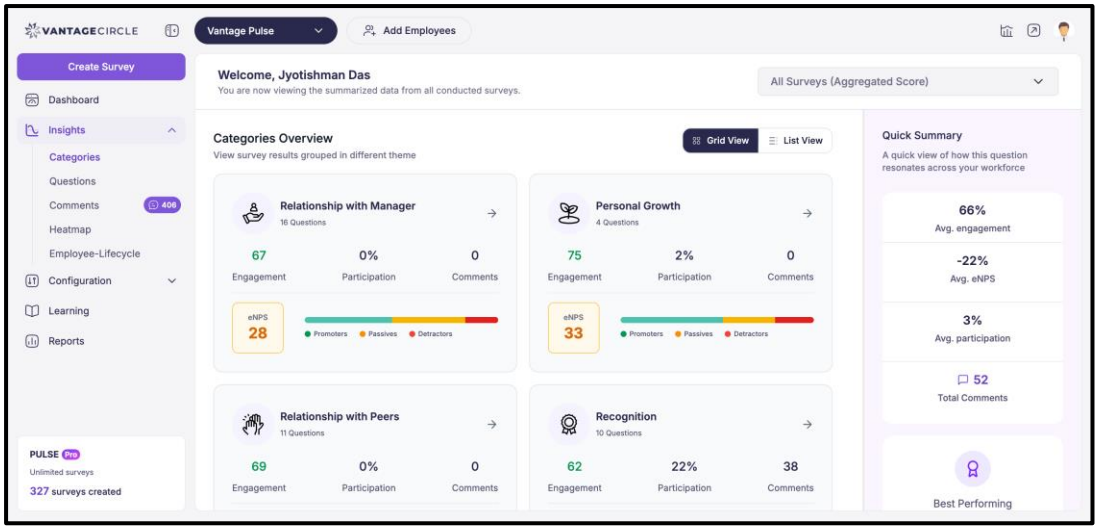
# Vantage Pulse - Step-by-Step Guide (Insights) for HRs & Admins

## 1. Insights → Categories



The **Insights** section is available from the left-hand menu and is now organized as a **dropdown** with multiple sub-sections.

The first section under Insights is **Categories**.



The **Categories** view provides an overview of survey results grouped by different themes or categories.

On this screen, you can view:

- A list of all survey **categories**, displayed as individual cards
- The **number of questions** mapped to each category
- **Engagement score** for each category
- **Participation rate** for each category
- **Total comments** received for each category
- **eNPS score**, along with a visual breakdown of Promoters, Passives, and Detractors

You can switch between:

- **Grid View** and
- **List View**, depending on your preferred layout.

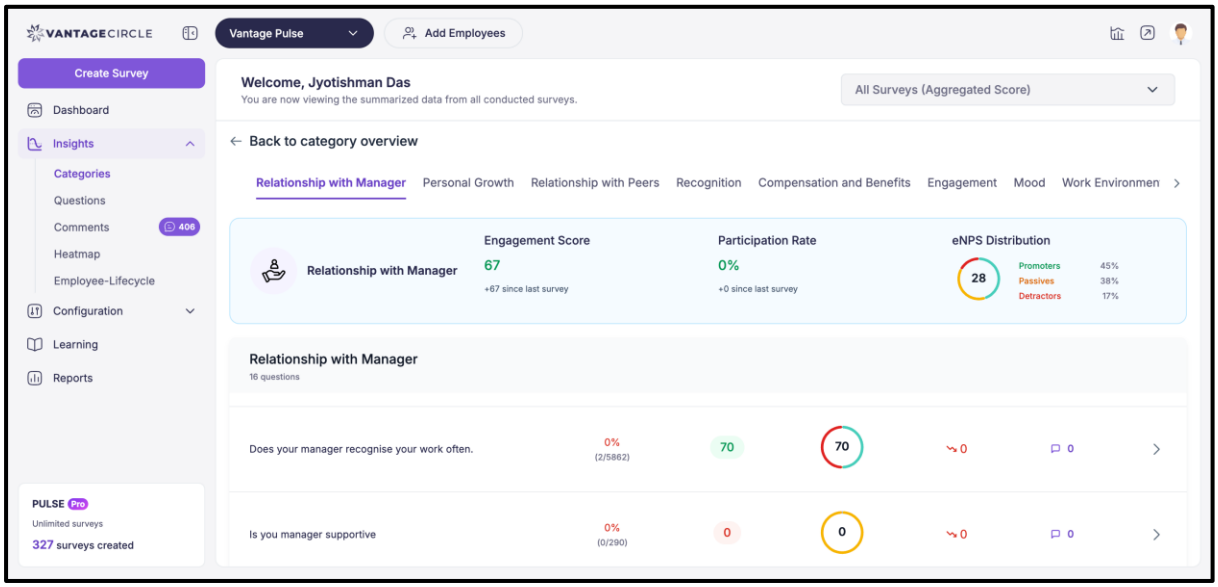
## Quick Summary Panel

On the right-hand side, a **Quick Summary** panel provides a snapshot of overall performance, including:

- Average Engagement
- Average eNPS
- Average Participation
- Total Comments
- Best-performing category
- Needs Attention Category

## Category-Level Insights

Clicking on any category from the **Categories** overview opens the **Category-Level Insights** page. This view provides a detailed breakdown of performance for the selected category.

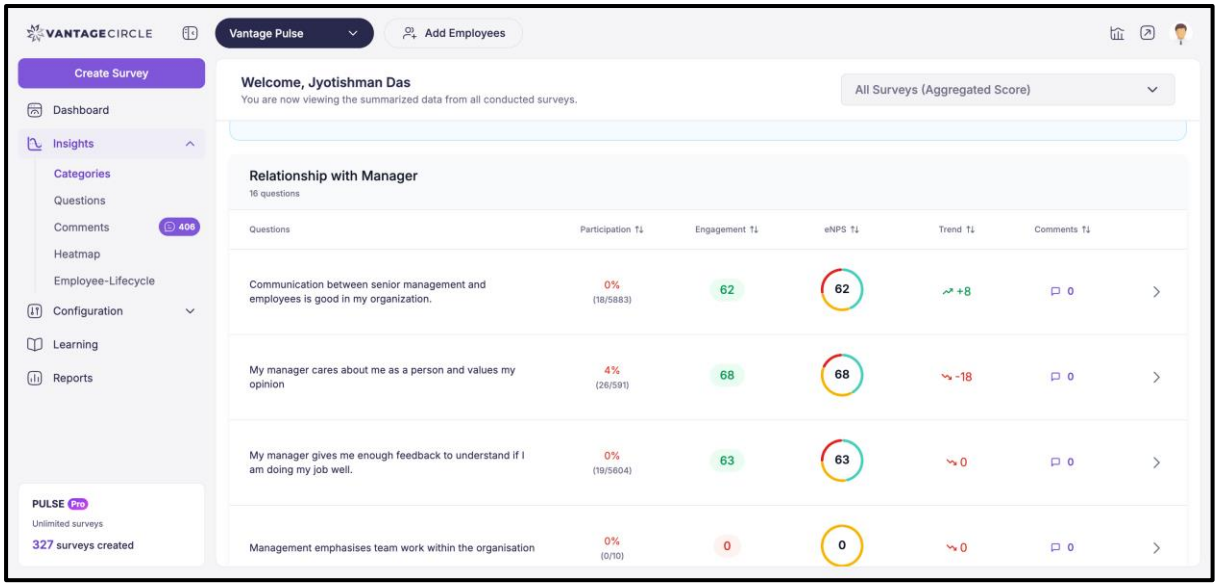


At the top of the screen, you can see:

- **Category name**
- **Engagement Score**, along with the percentage change since the last survey
- **Participation Rate**, with change since the last survey
- **eNPS Distribution**, showing the split between Promoters, Passives, and Detractors

You can also navigate between categories using the category tabs displayed at the top of the page.

## Question-Level Breakdown



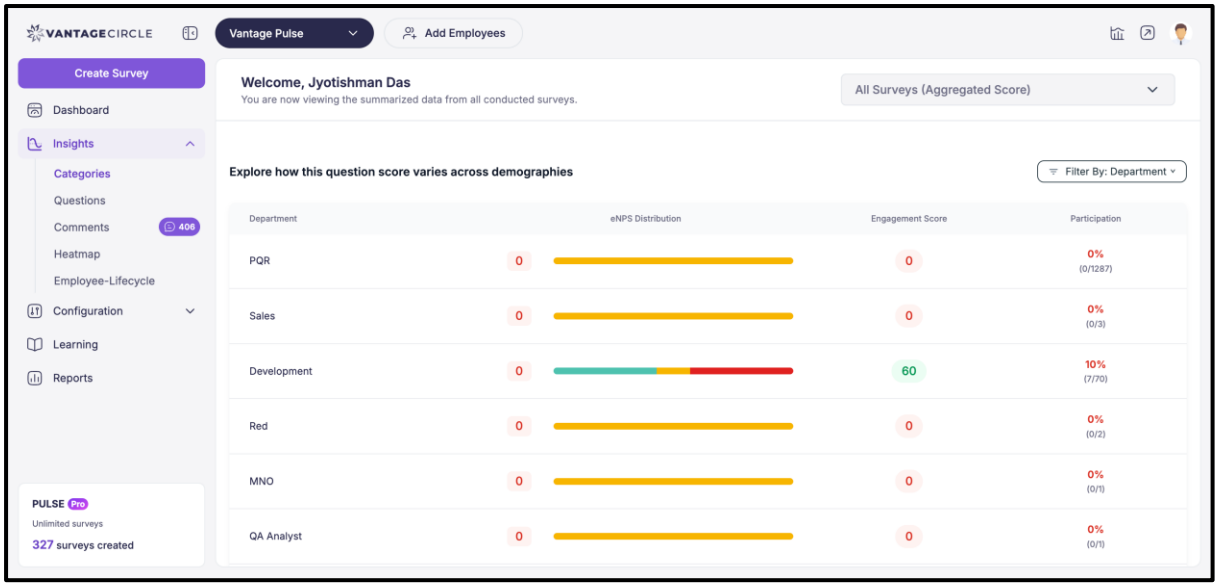
Below the summary, all questions mapped to the selected category are displayed in a table format.

For each question, you can view:

- **Participation rate**
- **Engagement score**
- **eNPS score**
- **Trend**, indicating improvement or decline over time
- **Total comments** received for that question

Clicking on a specific question opens a detailed breakdown showing how different departments perform for that question, including their eNPS score, engagement score, and participation rate.

## Demographic Breakdown



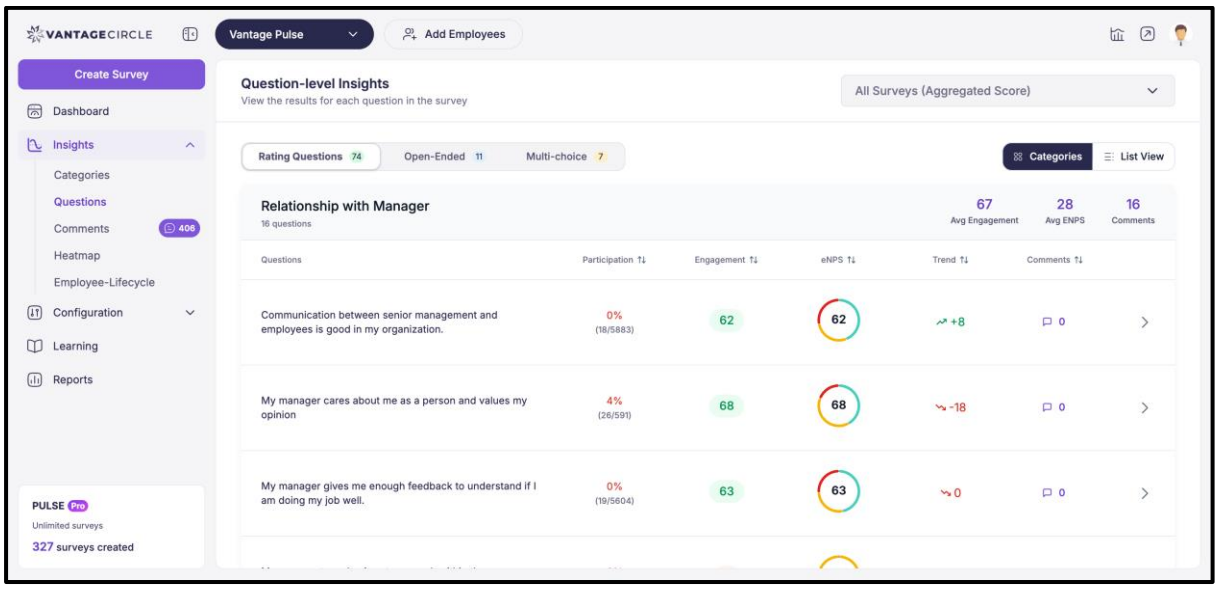
At the bottom of the page, you can explore how question scores vary across different demographics.

This section allows you to:

- View **eNPS distribution**, **engagement score**, and **participation rate** by segment
- Apply filters (for example, by **Department**) to analyze responses across different employee groups

This detailed view helps identify patterns, gaps, and trends within a category and across different segments of the organization.

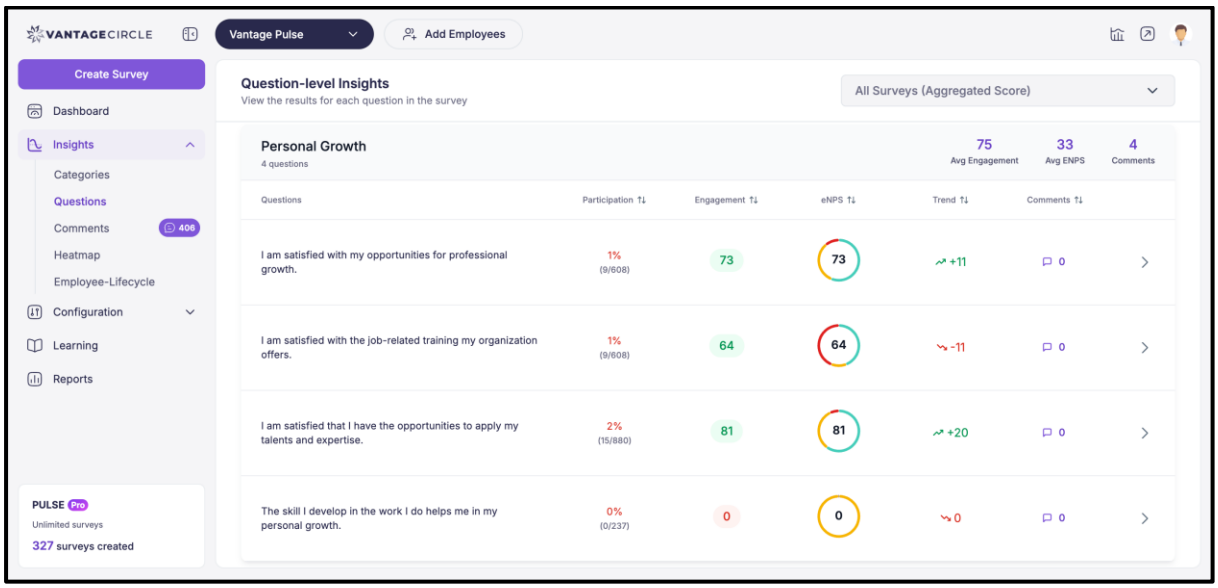
# Questions



The Questions section provides a detailed, question-level view of survey responses across all categories. Questions are grouped by category and can be filtered by question type to analyze quantitative and qualitative feedback separately.

At the top of the page, you can switch between **Rating**, **Open-ended**, and **MCQ** questions.

## Rating Questions



Rating questions capture quantitative feedback from employees and are used to measure engagement levels and eNPS scores. This view helps you analyze performance at both the **category level** and the **individual question level**.

## Category Overview

In the Rating Questions view, questions are grouped under their respective categories (for example, Relationship with Peers, Recognition, Personal Growth, etc.).

At the top of each category, a summary is displayed showing:

- **Average Engagement Score** for the category
- **Average eNPS Score** across all rating questions in the category
- **Total number of Comments** received for the category

This summary provides a quick snapshot of how the category is performing overall before reviewing individual questions.

## Question-level Metrics

Below the category summary, individual rating questions are listed.

For each rating question, the following metrics are displayed:

- **Participation** – percentage of employees who responded, along with response count
- **Engagement Score** – overall engagement level for the question
- **eNPS Score** – average eNPS score, visualized using a circular indicator
- **Trend** – change in performance compared to the previous survey cycle
- **Comments** – total number of comments for the question

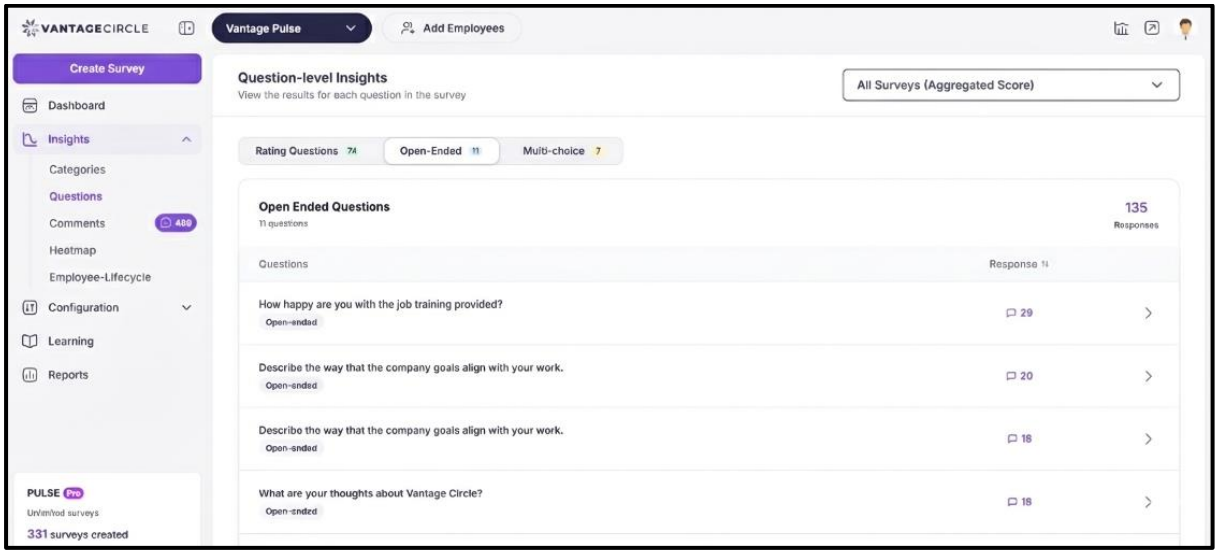
## Drill-down Insights

Clicking on a rating question opens a detailed view showing:

- Department-wise eNPS distribution
- Engagement scores by department
- Participation rates across departments

This helps identify team-level variations and areas requiring focused action.

## Open-ended Questions



Open-ended questions capture qualitative feedback from employees, allowing them to share detailed thoughts, opinions, and suggestions in their own words. This section helps you understand the context and reasoning behind employee sentiment.

### Overview

When the **Open-ended** question type is selected in the Question-level insights view, all open-ended questions from the selected surveys are displayed in a list format.

Unlike rating questions, open-ended questions focus on **responses and** comments, rather than engagement or eNPS scores.

At the top of the section, you can view:

- **Total number of open-ended questions**
- **Total responses received** across all open-ended questions

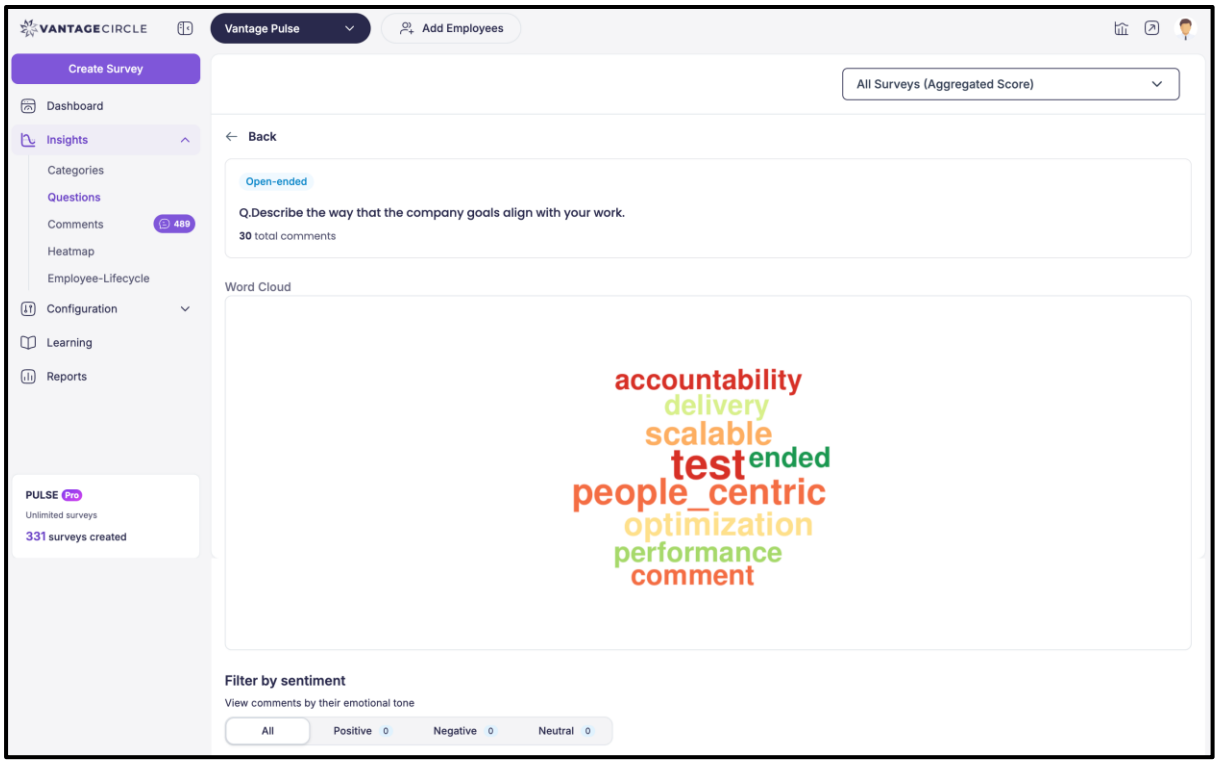
### Question List View

Each row in the Open-ended Questions view represents a single question and displays:

- **Question text**
  The full open-ended question asked in the survey.
- **Question type indicator**
  Clearly marked as open-ended for easy identification.

- **Response count**
  Displays the total number of responses received for that question.

## Drill-down Insights



When you click on an open-ended question, the detailed response page opens.

## Question Information

The top section shows:

- The full question text
- Question type
- Total number of comments received

## Word Cloud

A **Word Cloud** is automatically generated from employee responses.

The word cloud displays frequently occurring words from all submitted comments:

- Larger words indicate higher frequency
- Smaller words indicate lower frequency

This helps you quickly see commonly mentioned terms across responses.

## Multi-choice (MCQ) Questions

The **Multi-choice** tab displays all multiple-choice questions included in the survey. These are questions where employees select one option from a list of predefined answer choices.

Questions are grouped under their respective categories.

## Question Overview

For each multi-choice question, the following information is shown:

- **Question text**
- **Participation rate** – percentage of employees who answered the question
- **Number of comments** – total comments submitted for that question (if comments were enabled)

A comments indicator appears next to the question showing how many employees left additional feedback.

## Response Distribution

Each question displays how responses are distributed across the available answer options.

For every option, the screen shows:

- Option text
- Percentage of respondents who selected the option
- Number of responses received
- A horizontal bar representing response share

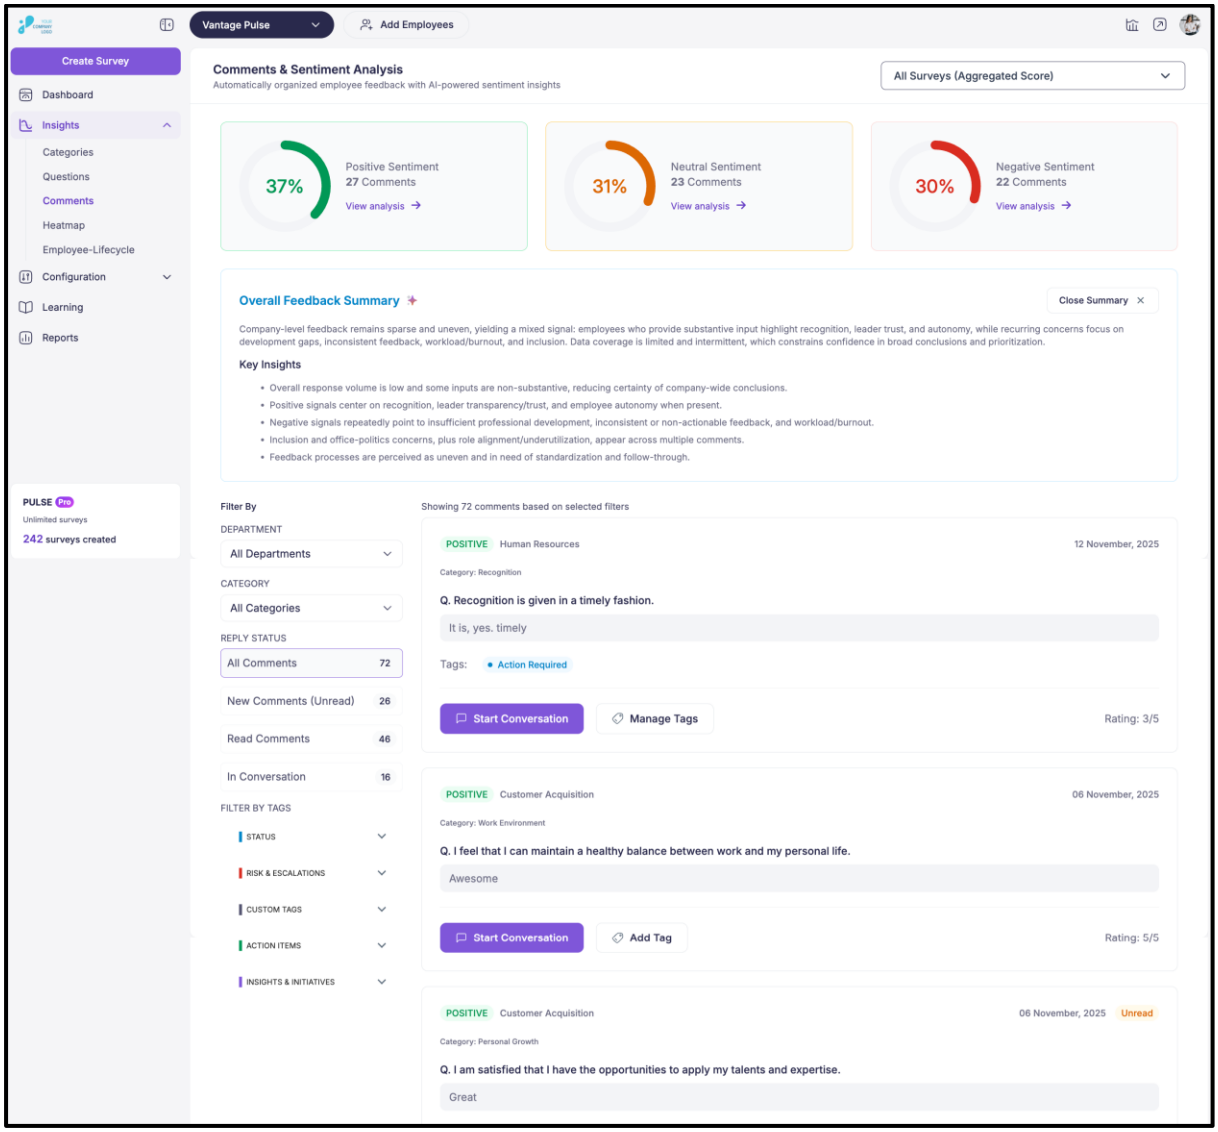
This helps you understand which answer choice was selected most frequently.

## Viewing Comments

If comments are enabled for the question, the **comments count** next to the question can be selected to view the submitted responses.

The comments view displays the written feedback provided by employees for that specific multi-choice question.

## Comments



The **Comments** section displays all employee comments collected across surveys in one centralized view.

## Sentiment Summary

At the top of the page, a sentiment overview is shown. Comments are automatically classified into three groups:

- **Positive Sentiment** – favorable feedback
- **Neutral Sentiment** – balanced or informational feedback
- **Negative Sentiment** – critical or concern-related feedback

Each card shows:

- Percentage of total comments
- Number of comments in that sentiment group

Selecting **View analysis** opens the detailed list filtered by that sentiment.

## Overall Feedback Summary

Below the sentiment cards, an **Overall Feedback Summary** panel is displayed.
This section provides an automatically generated summary of the collected comments along with key insights derived from employee feedback.

## Comment Filters

On the left side, comments can be filtered using the available filters:

**Department** – view comments from a specific department
**Category** – filter comments based on survey category
**Reply Status**

- All Comments
- New Comments (Unread)
- Read Comments
- In Conversation

You can also filter comments using tags under **Filter by Tags**, including:

- Status
- Risk & Escalations
- Custom Tags
- Action Items
- Insights & Initiatives

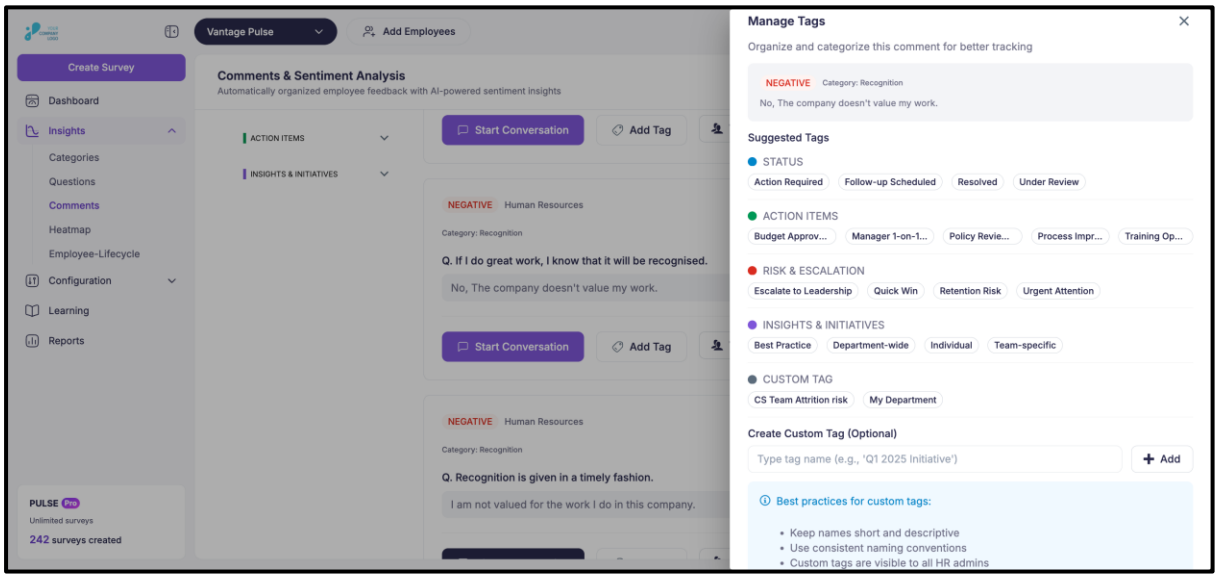
## Comment List

The main panel displays individual employee comments.
Each comment entry shows:

- Sentiment label (Positive/Neutral/Negative)
- Employee department
- Survey category
- Question related to the comment

- Comment text
- Date of submission
- Rating (if associated with a rating question)

## Tagging Comments



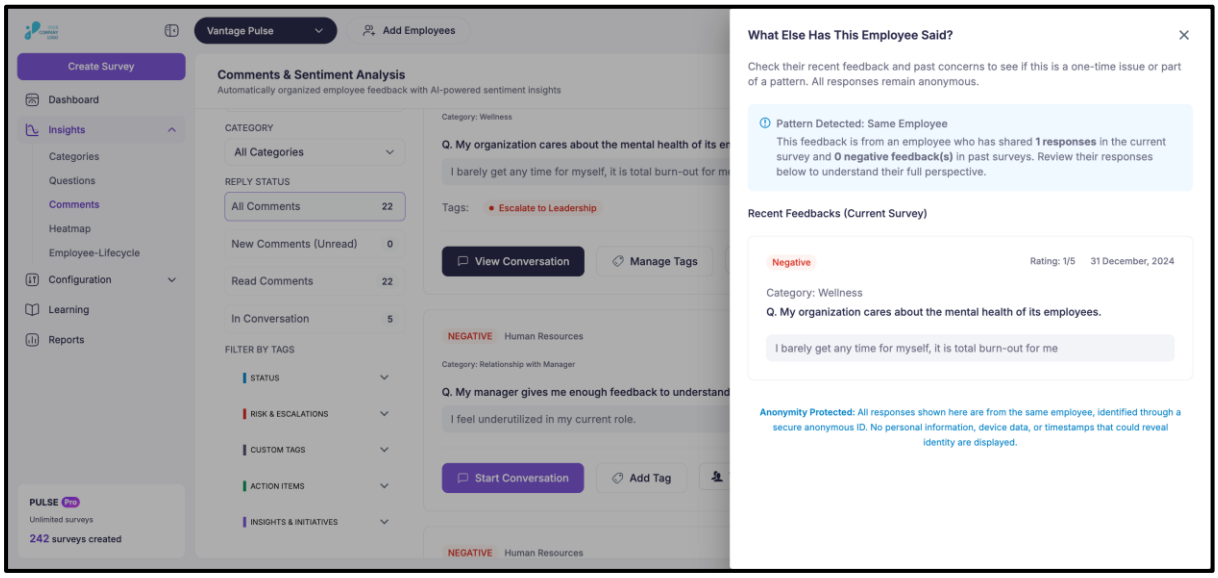
You can select **Add Tag** or **Manage Tags** to categorize a comment for easier tracking and follow-up.

Suggested tag groups include:

- **Status** (Action Required, Under Review, Resolved)
- **Action Items** (Training, Policy Review, Manager Discussion, etc.)
- **Risk & Escalation** (Escalate to Leadership, Retention Risk, Urgent Attention)
- **Insights & Initiatives**
- **Custom Tags**

You can also create your own custom tags. Tagged comments can later be filtered from the left-side panel.

## Reviewing Related Feedback (What Else They've Said)



For any comment, you can select **What Else They've Said** to view additional feedback submitted by the same anonymous respondent.

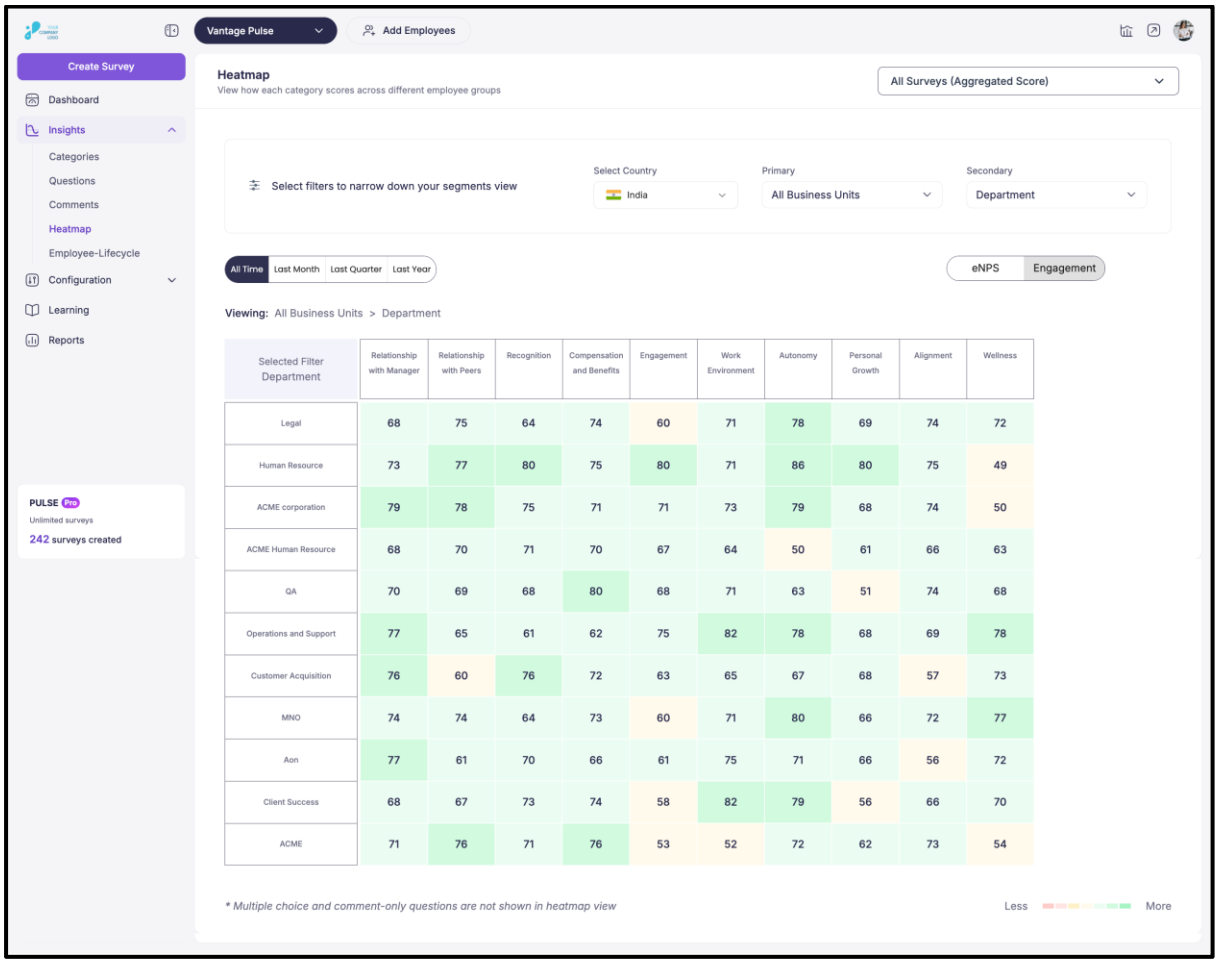
This opens a panel displaying the respondent's recent feedback while maintaining anonymity. The panel shows:

- The related survey question
- Submitted response
- Sentiment
- Rating (if applicable)
- Date of submission

A pattern indicator may appear when multiple responses are detected from the same anonymous respondent.

All feedback is linked using a secure anonymous identifier. No personal or identifying information is revealed. This allows administrators to check whether similar feedback is coming from a single source or from multiple employees, while preserving employee confidentiality.

# Heatmap



| Selected Filter Department | Relationship with Manager | Relationship with Peers | Recognition | Compensation and Benefits | Engagement | Work Environment | Autonomy | Personal Growth | Alignment | Wellness |
|---|---|---|---|---|---|---|---|---|---|---|
| Legal | 68 | 75 | 64 | 74 | 60 | 71 | 78 | 69 | 74 | 72 |
| Human Resource | 73 | 77 | 80 | 75 | 80 | 71 | 86 | 80 | 75 | 49 |
| ACME corporation | 79 | 78 | 75 | 71 | 71 | 73 | 79 | 68 | 74 | 50 |
| ACME Human Resource | 68 | 70 | 71 | 70 | 67 | 64 | 50 | 61 | 66 | 63 |
| QA | 70 | 69 | 68 | 80 | 68 | 71 | 63 | 51 | 74 | 68 |
| Operations and Support | 77 | 65 | 61 | 62 | 75 | 82 | 78 | 68 | 69 | 78 |
| Customer Acquisition | 76 | 60 | 76 | 72 | 63 | 65 | 67 | 68 | 57 | 73 |
| MNO | 74 | 74 | 64 | 73 | 60 | 71 | 80 | 66 | 72 | 77 |
| Aon | 77 | 61 | 70 | 66 | 61 | 75 | 71 | 66 | 56 | 72 |
| Client Success | 68 | 67 | 73 | 74 | 58 | 82 | 79 | 56 | 66 | 70 |
| ACME | 71 | 76 | 71 | 76 | 53 | 52 | 72 | 62 | 73 | 54 |

## Heatmap

The **Heatmap** section helps you quickly understand how different employee groups are performing across survey categories.

Here, category scores are displayed in a grid format where:

- Rows represent employee segments (for example: departments, business units, etc.)
- Columns represent survey categories such as Relationship with Manager, Recognition, Engagement, Wellness, and more
- Each cell shows the score for that specific group in that specific category

You can apply filters at the top to refine the view:

- Select Country
- Choose a Primary filter (e.g., Business Unit)
- Choose a Secondary filter (e.g., Department)

- Adjust the time range (All Time, Last Month, Last Quarter, Last Year)
- Toggle between **eNPS** and **Engagement** score view

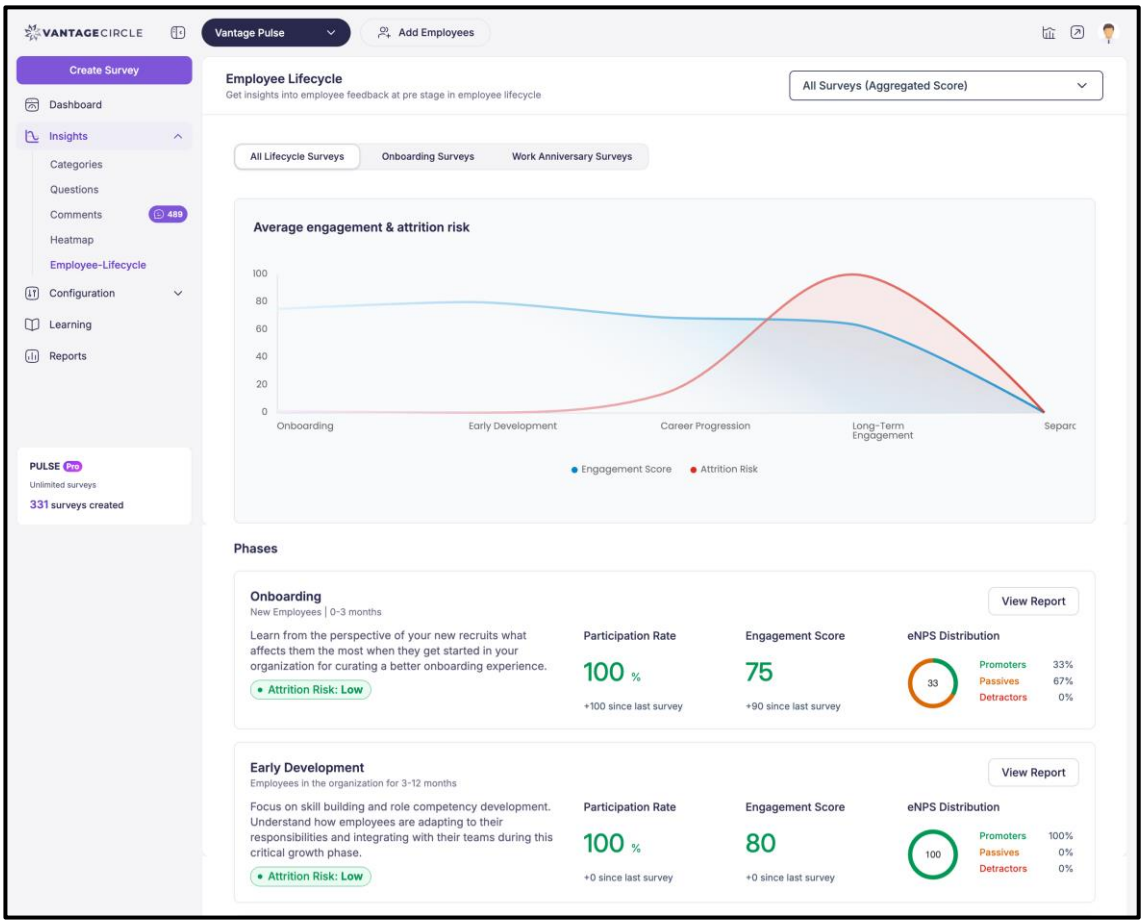
The color intensity helps you quickly interpret performance:

- Higher scores appear in greener shades
- Lower scores appear in lighter/yellowish shades

**Note:** All the scores displayed in the heatmap are clickable to view detailed insights.

The **Employee Lifecycle** section helps you understand employee feedback at different stages of their journey in the organization. The graph at the top compares **Engagement Score** and **Attrition Risk** across lifecycle stages.

## Employee Lifecycle



Below the graph, feedback is grouped into the following stages:

- **Onboarding (0–3 months)** – new joiner experience
- **Early Development (3–12 months)** – adaptation to role and team
- **Career Progression (1–3 years)** – growth and opportunities

- **Long-Term Engagement (3+ years)** – retention and long-term motivation
- **Separation** – employees in notice period

For each phase, the platform shows:

- Participation Rate
- Engagement Score
- eNPS distribution (Promoters, Passives, Detractors)
- Attrition Risk (Low / Critical)

You can also click **View Report** on any phase to open detailed insights for that specific lifecycle stage.
