Case Study

accessone.

AccessOne was losing talent with zero visibility into why employees were leaving, leaving leadership flying blind during critical organizational changes. They deployed Vantage Pulse to capture real-time anonymous feedback and track sentiment shifts around key company events in one integrated platform. **The result: 67% immediate participation, discovered peer relationships were their culture's secret weapon, and now actively nurture those connections - turning their biggest strength into their retention advantage.**

> *"Seeing honest feelings in real numbers? Priceless. We could actually watch morale lift after each change."*
