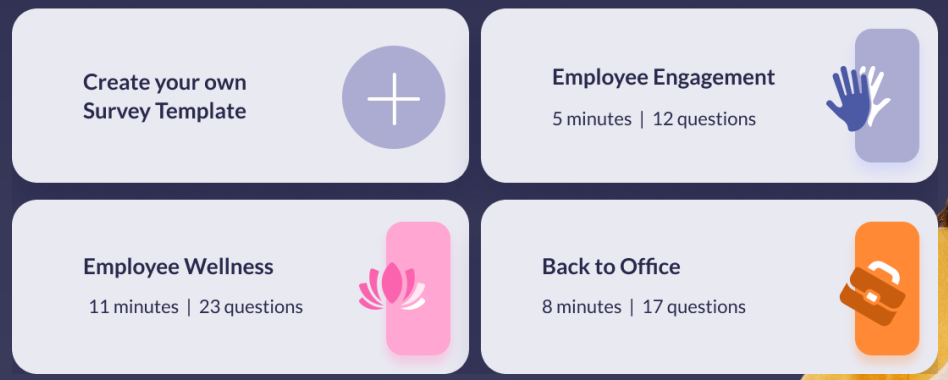
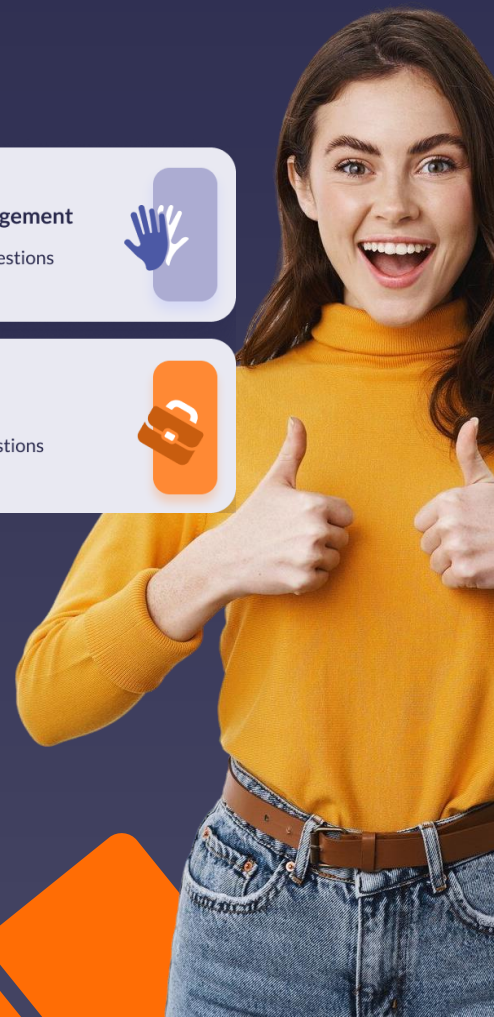
VANTAGE PULSE

Listening to Your Employees Powers Better Decisions





Powered by VANTAGECIRCLE

You're Doing Everything to Support Your People…
But Still Losing Your Best Talent?

Even Great HR Leaders Are Caught Off Guard by Silent Disengagement

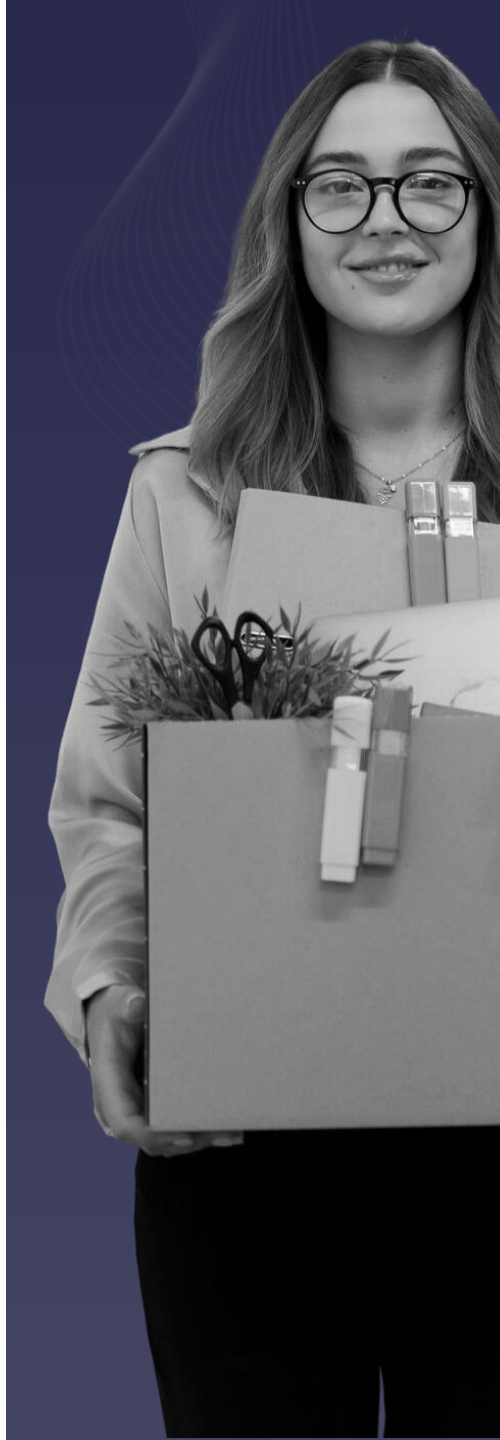
And when they go, so does productivity, morale, and momentum.

But employees still leave without warning, quietly, and often, preventably.

You've built programs.
You've launched surveys.

"You can't fix what you don't hear in time."

Gallup estimates that actively disengaged employees cost the U.S. between **$483 billion** and **$605 billion** each year in lost productivity



The Real Problem? Traditional Feedback Tools Keep You in the Dark

Outdated Tools Make It Hard to Hear What Matters, Until It's Too Late

The Problem

- Annual surveys are too slow
- Generic tools lack context
- Surveys lack anonymity
- Feedback takes weeks to surface

What It Looks Like

- Burnout is missed until the exit interview
- You get vague insights, not clear action
- You don't get candid honest responses
- Interventions come after the damage is done

"You're listening, but not in time to make a difference."
